### Performance Chart

#### Please Note:

- Nothing in this fact-sheet should be construed as advice and is not a recommendation to buy or sell units.
- Please remember that past performance is not an indication of future performance and may not be repeated.
- Funds that ultimately invest in foreign currencies or shares carry a risk that the effect of fluctuations in exchange rates could reduce the value of the fund or income from it.
- Funds that invest in underlying assets that are newly created or small may be subject to higher fund expenses as a percentage of the fund, and the value of the investment consequently reduced. Small funds may be subject to greater volatility in the event of large purchases or withdrawals.
- The value of investments, and the income from them, can go down and well as up and you may get back less than you have invested.
- High volatility funds may result in a substantial loss as a result of the possibility of sudden and large falls in value
- The 3 & 5 year performances shown in the performance summary table are annualised. This is the average annual return for the 3 year and 5 year periods.
